

FRICITION DISCS

Rydahls offers friction discs that can be used in many different applications such as rotators, engines, transmissions and industrial brakes.

What type of material does your application need? We offer friction discs with a surface coat of bronze spray, paper, kevlar or according to your needs. You can, of course, also get discs in organic material.

We arrange production of small to large series with short lead times - no job is too small or big for us. Please do not hesitate to contact us for a quotation or advice. We are happy to assist you with technical advice and support for the best solution for you as a customer.

Read more about our friction discs on our website, www.rydahls.com.
